Parth Chauhan

Senior Solutions Engineer Pre-Sales · Solutions Architecture · Agentic AI

PROFILE

Solutions Engineer with 5+ years across SaaS, AdTech and conversational AI. I design integration-heavy and AI-driven solutions, prove them with working PoCs, and close enterprise deals. I also build what the sales organisation is missing: pricing tools, AI agents, handover processes and product features that started as field feedback.

CORE COMPETENCIES

- Solution architecture & design
- Technical discovery & scoping
- PoC development & validation
- RFP / RFI & security reviews
- Executive demos & workshops
- Value-based selling & deal strategy
- Product feedback & roadmap input
- Process design & sales enablement

AI & AUTOMATION

- Agentic AI agents (chat & voice)
- Prompt & instruction design, RAG knowledge bases
- MCP integrations
- Zapier · Pabbly · n8n · Make
- Google Apps Script
- Chatbot & workflow design

CRM & INTEGRATIONS

- HubSpot · Salesforce · Zoho CRM · LeadSquared
- Shopify · Razorpay · Chargebee
- WhatsApp Business API · Meta platforms
- REST APIs · Webhooks · JSON

TECHNICAL

- JavaScript · HTML/CSS · SQL · Python · Java · C++
- Jira · Confluence · Looker · GTM · Zendesk

PROFESSIONAL EXPERIENCE

Senior Solutions Engineer (Pre-Sales) · Wati.io

Apr 2026 – Present

Conversational AI & WhatsApp Business SaaS · India · Promoted from Presales Solutions Consultant

Solution Architecture & Deal Leadership

- Lead the technical sales cycle for SMB, mid-market and enterprise accounts: discovery, solution architecture, PoC, technical validation, scoping and close, across **6–7+ concurrent opportunities**.
- Closed strategic enterprise accounts including **Vogue, Policybazaar and Mahindra** through consultative, value-based selling, sustaining a **70%+ PoC-to-close** rate and averaging **150% quota attainment** on a blended pre-sales and sales target.
- Architect end-to-end customer engagement solutions connecting messaging APIs with CRM, e-commerce, payment and ERP systems through **REST APIs, webhooks and iPaaS** platforms (Zapier, Pabbly, n8n, Make).
- Cut customer implementation time by **~75%** by pre-building production-ready workflows during the PoC phase.
- Own technical, product and security responses for **RFPs, RFIs and security questionnaires**, and deliver executive demos and technical workshops to C-level and engineering stakeholders.

Agentic AI & Automation

- Design and deploy **agentic AI agents** that reason over knowledge bases, call live REST APIs and complete multi-step tasks such as appointment booking, order tracking, post-booking support and human escalation, for e-commerce, healthcare, travel and D2C prospects.
- Co-built the company's **first voice AI sales agent**, now live: it calls new trial users on day 1, 3 and 7, qualifies plan fit, sends payment links and routes enterprise leads to sales.
- Built **Google Apps Script** automations for customers that run in production, syncing spreadsheet data with messaging workflows.

Product Strategy & Roadmap Influence

- Two of my field recommendations shipped as platform features in Sep 2026: an **AI node that captures customer data through natural conversation**, live for 70% of mid- and upper-tier accounts across WhatsApp, Instagram and Messenger and publicly credited to me; and an **AI copilot that builds, audits and fixes automations from plain-language requirements**, rolling out to **~16,500 accounts**.
- Turn customer and market feedback into prioritised product requirements with clear business impact, and escalate deal-critical gaps to Product and Engineering.

Sales Tooling, Process Design & Enablement

- **Centralised sales pricing** by building six regional pricing calculators with plan switching, official rate cards and live currency conversion, now the standard tool for Account Executives on calls.
- Designed the **pre-sales to post-sales handover framework** (scoping documents, implementation quotes, technical handover documents) so delivery teams start without re-discovery, and helped map the SE operating model, RACI and improvement plan.
- Built the pre-sales playbook and co-built a **sales readiness assessment** and 3-week onboarding programme; run weekly product and pricing enablement and coach AEs through recorded call reviews.
- Run **revenue attribution audits** reconciling demo attendance with CRM and billing data to credit conversions accurately.
- Earned the company's **Meta dual-certification partner badge** with one teammate, and represent the company at Meta events and workshops.

Presales Solutions Consultant · Wati.io

May 2024 – Apr 2026

- Designed WhatsApp engagement strategies (chatbots, automation, analytics, integrations and implementation roadmaps) for **250+ prospects per quarter**.
- Ran in-depth discovery on business objectives, technical requirements and ROI, **halving average sales cycles**.
- Partnered with Account Executives on RFP/RFI responses and solution architectures, driving a **70%+ win rate**.
- Named **Ownership Champion Q4'25** by leadership for ownership and results beyond scope.

CERTIFICATIONS

- **Meta Certified** WhatsApp for Business Technical Implementation
- **Meta Certified** Business Messaging Strategy
- Cyber Security Foundation Professional Certificate
- CompTIA CertMaster Learn for Linux+
- Cisco Introduction to Cybersecurity

AWARDS

- Ownership Champion Q4'25, Wati
- SPOT Award, Whatfix
- Highest-ever quarterly CSAT (115%), Whatfix
- 150% average quota attainment

EDUCATION

B.Tech, Computer Science
Lovely Professional University
2018 – 2022 · CGPA 8.2
40% Merit Scholarship

Senior Secondary (Non-Medical)
V.V. D.A.V. Public School, New Delhi

TRAININGS

- JP Morgan Software Engineering Virtual Experience
- HackerRank: Python, Problem Solving
- Web Development Masterclass
- Coding Blocks: C++

INTERESTS

E-Sports · Badminton · Swimming · Travel · Riding

Technical Solutions Engineer · Criteo — Jul 2023 – May 2024

AdTech · Gurugram, India

- Architected AdTech solutions for enterprise clients: API-based data feeds, audience segmentation and campaign attribution workflows.
- Validated data pipelines and resolved integration conflicts across MMP and commerce-platform ecosystems.
- Led root-cause analysis on critical production issues with Engineering, maintaining a **100% SLA hit rate**.

Solutions Engineer · Whatfix — Apr 2021 – Jul 2023

Digital Adoption SaaS · Gurugram, India · Intern to Full-time (Jan 2022)

- Handled 30–35 client calls a day for technical troubleshooting, walkthroughs and escalations, with first response under 5 minutes.
- Achieved the **highest-ever quarterly CSAT (115%)** and received the **SPOT Award** from senior leadership.
- Built support workflows that resolved most queries within 4–5 exchanges, reducing average handle time.

QA Intern · Virtually Testing Foundation — Oct 2020 – Mar 2021

Remote · Los Angeles, USA

- Executed functional and regression testing across release cycles, logging and verifying 20+ defects.

PROJECTS & PRODUCT CONTRIBUTIONS

- **Product Recommendation: Conversational Data Capture** — proposed an AI chatbot node that collects emails, phone numbers and references from free-text replies; shipped Sep 2026 across WhatsApp, Instagram and Messenger and credited to me at launch.
- **Product Recommendation: AI Automation Copilot** — proposed an assistant that builds, reviews and fixes automation rules and chatbot flows from plain language, plus a weekly health-check agent; rolling out to ~16,500 accounts.
- **Regional Pricing Calculators** — six browser-based tools (HTML/JS, GitHub Pages) with tiered rate cards, multiple billing cycles and live FX, replacing a low-code internal tool.
- **Voice AI Sales Agent** — automated trial follow-up, lead qualification and routing; first voice AI deployment in the company.
- **Agentic AI PoCs** — bilingual e-commerce support agent on Shopify; clinic appointment agent with 9 live API actions; travel post-booking support; consumer-appliance service agent.
- **Customer Automation Scripts** — Google Apps Script integrations running in customer production environments.
- **Internal Support Agent** — AI agent trained on the company help centre to answer product questions.
- **Revenue Attribution Model** — repeatable reconciliation of meeting, CRM and billing data for demo-to-paid credit.
